Application Chart

TYPE OF HVAC

COILS	SHINEY BRIGHT™ Non-Acid Aluminum Cleaner and Brightener	SHINEY BRIGHT™ Aerosol Non-Acid Aluminum Cleaner and Brightener	COILEX™, M/M Evaporator Coil Cleaner and Filter Coating	CHILL CLEAN™, M/M Aerosol Coil Cleaner	KOIL-KLENZ™ Heavy-Duty Non-Acid Industrial Coil Cleaner
	PAN MATE™, M/M Timed-Release Condensation Pan Tablets	FAST ACT™ II, C/M Air Conditioner Drip Pan Microbiocide			

CHILL CLEAN™, M/M

Coil Cleaner

Multi-Mist™ Chill Clean aerosol cleans coils and rinses automatically with the natural condensation on evaporator coils, leaving no residue and saving costly labor time. It is ideal for indoor applications where water cannot be used to rinse coils; penetrates and cleans without agitation. It is corrosion-inhibited, so it protects metals and will not discolor aluminum. Chill Clean also cleans effectively without the use of acids and is non-corrosive and nonflammable.

APPLICATIONS: Recommended for use on all HVAC heat-exchange coils.

COILEX™, M/M

Evaporator Coil Cleaner and Filter Coating

Multi-Mist™ Coilex is a pleasant-smelling formulation that cleans air conditioner and heating coils of accumulated grease, lint, soil, tobacco film, and other efficiency-robbing particles. No-rinse is necessary when used on evaporator coils. Its detergents penetrate and clean without agitation and will not harm metals normally used in air conditioning equipment.

APPLICATIONS: Recommended for cleaning air conditioning and heating coils and as a protective filter coating for disposable or permanent filters.

FAST ACT™ II, C/M

Air Conditioner Drip Pan Microbiocide

Check-Mark™ Fast Act II aids in eliminating leaking and overflowing of air conditioner condensate pans and helps eliminate buildup of blockages in pans and drain lines. Produces a continuous release of active ingredients that controls fouling and inhibits the growth of slime forming and odor causing bacteria. EPA registered.

APPLICATIONS: Recommended for use in air conditioner condensate drain pans.

KOIL-KLENZ™

Heavy-Duty Non-Acid Evaporator Coil Cleaner

Koil-Klenz automatically cleans evaporator cooling coils by normal condensation. It requires no rinsing, loosens insulating deposits as it cleans, and keeps air ducts cleaner by making filters more effective. Keeping coils clean helps provide maximum heating and cooling efficiency without excess energy usage. Koil-Klenz also increases filter efficiency by trapping dust and dirt particles from the air.

APPLICATIONS: Recommended for cleaning air conditioning coils, heating coils, and permanent filters.

PAN MATE™, M/M

Timed-Release Condensation Pan Tablets

Multi-Mist™ Pan Mate helps prevent condensation drain blockages in air conditioners and cooling units. Tablets disperse rust, corrosion, and sludge accumulations that clog condensation drains and cause water overflow damage to carpets, floors, walls, and ceilings. It works immediately upon contact with condensate water and protects for up to three months. Simply place directly into condensation pans in any type air conditioning unit, including window, wall, and overhead. Available in 3 sizes.

APPLICATIONS: Recommended for use in any type air conditioning unit.

SHINEY BRIGHT™

Non-Acid Aluminum Cleaner and Brightener

Shiney Bright provides powerful foaming action that penetrates deep into the deposits that coat and dull aluminum surfaces—actually cleans coils from the inside out by breaking up encrusted soils and lifting them to the surface to be rinsed away easily. It contains no acids and is less harmful to equipment than conventional acid products.

APPLICATIONS: Recommended for use on air conditioning coils, aluminum trailers, unpainted aluminum sheds, roofs and buildings, grates and ramps in boiler and engine rooms, scaffolding and ladders, engine blocks, aluminum wheel covers, aluminum boats, and any non-polished or non-anodized aluminum surface.

SHINEY BRIGHT™

Non-Acid Aluminum Cleaner and Brightener

Shiney Bright aerosol cleans and brightens aluminum surfaces without agitation. The non-acid formula eliminates the risk of acid attack on aluminum and is less harmful to equipment than conventional acid products. Its foaming action clings even to vertical surfaces and goes to work immediately without agitation.

APPLICATIONS: Recommended for use on trucks, buses, storage tanks, vehicles, aluminum trailers, boats, unpainted aluminum sheds, roofs, buildings, scaffolding and ladders, engine blocks, and air conditioning coils.
